Summary

Consummate professional with expertise in UX and product design. Versed in user-centric design throughout the entire product life cycle. Value-driven and versatile across waterfall and agile environments.

Experience

Principal Product Designer

Visor · June 2021 to current

Pair closely with the PM and CEO to define our feature roadmap, delivering full designs and documentation. End to end ownership of our product feedback and user research programs. Drive design strategy to deliver against OKRs and product metrics. Develop and evolve our global design library. Facilitate design direction with external designers.

Product Designer

Conductor · January 2017 to May 2021

Partnered with PMs and stakeholders to design and implement on company vision. Leveraged product feedback, research synthesis, and OKRs to prioritize feature development, design direction, and reported on growth to stakeholders. Evangelized modular design practices with product and engineering teams.

UX Designer

AndPlus · April 2015 to December 2016

Designed products supporting and enhanceing existing customer journeys for clients across industries. Leveraged various research methods to determine pain points in workflows, and conducted usability testing to optimize products.

Creative Director

CoCreation Works · June 2013 to April 2015

Designed products supporting and enhanceing existing customer journeys for clients across industries. Leveraged various research methods to determine pain points in workflows, and conducted usability testing to optimize products.
